

# Construction at Boulder City High School

We broke ground on Phase 2 of our Building Replacement on January 29, 2016, and moved into our new building which included over 20 classrooms, a lecture hall, and administrative office spaces on January 2, 2017. This Phase cost 17 million with over 42,000 square feet of building space.

The remaining phases, phase 3 and 4, in the master plan from 2005, include the performing arts center, fields and site improvements. Phase 3 will cost 15 million and includes a 454 seat theater, classrooms for choir, guitar, photography, and a broadcast studio. Phase 3 is approximately 22,000 square feet and will be completed in February of 2018. Phase 4 will include a new football field, concession stand, press box, visitor side bleachers and bathrooms, tennis courts, soccer field, and improvements to overall site. The completion date for Phase 4 is October 2018 costing 2.5 million dollars.
